SMARTfit™

Your brain, your life, for the long run...

SMARTfit Mini - Personal & Small Group Training, Dual-Task Cost and Cognitive Assessments

SMARTfits's Programming and Assessments are Easily Personalized to Meet Specific Needs & Abilities across the Full Spectrum of Care

Programming for older adults must be adaptable to meet a wide variety of training needs. SMARTfit's turnkey programming module are specifically designed to be fine-tuned and scalable to meet the needs of each person regardless of ability level.

"SMARTfit can improve executive functioning better than physical exercise alone or cognitive alone through dual tasking. The research supports that, and, if we can improve executive functioning that generalizes to things that have never been trained. This includes the ability to create a new memory, ability to pay attention, ability to inhibit behavior, problem solving and reasoning."

Dr Rob Winningham - **Phd. Neuroscience, Published Author, Western Oregon University**

"Lifestyle recommendations, purposeful engagement, and graded challenges are critical to the successful implementation of personalized brain health programming. So thrilled to have SMARTfit technology AND the brains of Dr. Rob Winningham as innovative partners."

Sue Paul - **Senior Director of Wellness and Brain Health at Asbury Methodist Village**

Your brain, your life, for the long run...™

SMARTfit ProTrainer - Group Dual-Task Training, Fun Competition, Social Engagement

The New SMARTfit ProTrainer Delivers a Fun, Socially Engaging Group HIIT Experience

Enjoy individual and team competition, including pickleball and other sports. Measure results for all participants in real time. Installed on a wall in a multipurpose room, the ProTrainer takes up no space when not in use.

"At the Pacific Institute of Neuro Technology, we have found that SMARTfit can provide a turnkey solution to deliver a variety of training activities such as strength, balance, agility, mobility, and neuromotor all in one through a single technology. At its core, SMARTfit's multimodal training incorporates scalable cognitive load through its turnkey programming for individuals at different stages of function offering both physical and cognitive engagement in different types of activities and we are seeing people have fun."

Ryan Glatt - MA, Neuroscience, Pacific Neuro Institute

"SMARTfit addressses clinical and training gaps indentified in our current medical and wellness models. SMARTfit is not only the leader, but is the only entity offering objectived cognitive assessment in single task (reaction time, visual identification, calculation, working memory, response inhibition), as well as dual task (combining with standardized physical assessments in gait, balance, and strength)."

Mike Studer - DPT, World Renowned expert in dual tasking

SMARTfit™

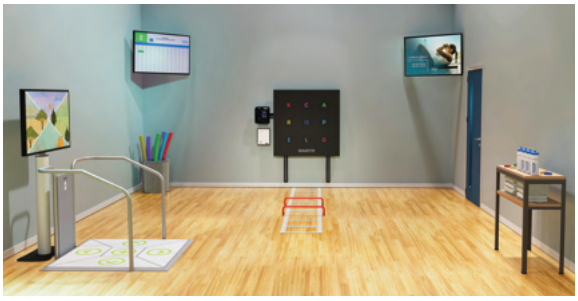

A Highly Marketable Program with a Strong ROI Potential

SMARTfit's gamified program with measurable results attracts, engages, and retains clients and staff. Increase ROI with SMARTfit's value-added assessments and training. Download our interactive ROI calculator at - https://smartfitinc.com/lp/roi.

PERSONAL TRAINING
