SMARTfit Multi-Trainer and ProTrainer

Getting Started with Group Training In Multi-Station Mode

SMARTfit®

Your Brain Matters

smartfitinc.com/fitness

Training the Brain and Body Through Movement

SMARTfit Brain Health Training can be integrated into any existing program by adding the benefits of cognitive training with movement. The result is that by engaging the brain in top-down executive function problem solving, planning and decision making while moving, the results are sped up significantly and transference to activities of daily performance happens faster.

Furthermore, executive function cognitive skills are transferable to skills that have not been specifically trained such as reasoning, working memory and problem solving. As a result, participants enjoy benefits that extend beyond the programming being trained.

Enjoy your new SMARTfit™ system!

For more information, see our website: www.smartfitinc.com/fitness/

Getting to Know Your SMARTfit ProTrainer/MultiTrainer

Chapter 1 Introduction:

Key Benefits of SMARTfit Training

SMARTfit delivers exciting evidence-based gamified programming that trains the brain and body together to improve brain health and human performance simultaneously. Known as dual tasking, respected published studies have shown this to be faster and more effective than training each separately.

Because all performance starts with the brain, SMARTfit benefits all populations. It integrates easily into existing programming to keep a facility buzzing 24/7. To engage, motivate, and retain end users, thousands of pre-designed activities and programs measure results and track progress in real time.

SMARTfit's unique strength is its "top-down" cognitive-motor, dual-task approach (CMDT). In addition to training the brain to react faster (bottom-up cognitive processing), it also challenges the executive function domain of the brain to make quicker and better decisions, solve problems, improve working memory, enhance cognitive flexibility, build cognitive reserve, and more.

All this happens while performing a variety of physical movements and tasks, which carry over to daily life. Studies have revealed that it is this combination of reaction and executive function training that leads to greater transference to real-world results than simpler reaction or non-brain-led strength or cardio training.

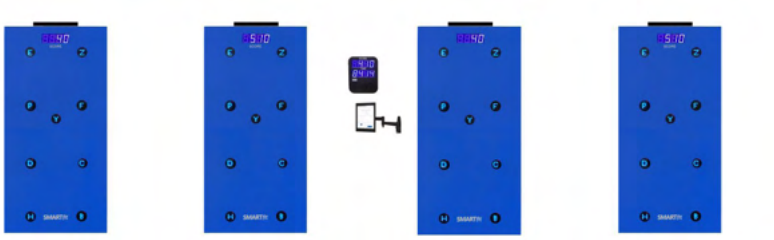

In summary, to enhance human performance and rehabilitation, SMARTfit links the brain and body through movement, creating and strengthening neural pathways so users can:

- Make quicker, smarter decisions while moving.
- Execute physical and mental skills more efficiently.
- Process visuals faster in order to react faster.
- Train to enter the flow/zone quickly.
- Improve focus, balance, coordination, and speed.
- Build cognitive reserve to delay cognitive decline.

SMARTfit Program Manual

This manual is designed for use by trainers offering a quick way to get started on the SMARTfit ProTrainer and MultiTrainer.

The SMARTfit MultiTrainer is a system with 2 to 4 separate panels, each forming a separate station with its own scoreboard and 9 multifunctional targets that include a computerized display and sensing system. This system operates in Training Station mode with each station

maintaining its own score and the controller scoreboard displaying the total score of all the stations.

The SMARTfit ProTrainer is a system comprised of 2 to 4 panels joined together and each incorporating 9 targets. It operates in two modes: MultiTrainer mode where every panel operates in competitive mode, and, in ProTrainer mode where all the joined panels operate as a single integrated target wall incorporating all of the targets. In ProTrainer setting, the system functions as a goal or the opposing side of nets sports such as tennis, pickleball or volleyball. This

manual focuses on group training in MultiTrainer Mode

Each activity has a specific purpose and numerous skill-developing benefits which should be repeated three times:

- LEARN the activity and get used to working together as a team.
- PRACTICE to improve both individually and as a team.
- CHALLENGE participants to achieve their best score, and to compare their scores with previous best scores or competitors.
- Encourage the entire group focus on improving their combined scores which are featured on the scoreboard located on the SMARTfit controller.

Number of participants:

Activities are designed to engage up to ten participants per station. Smaller groups may be advisable for older adults and to speed up progress and increase cardiovascular demand. For larger groups, we suggest fast moving round robins involving running, hopping, side stepping or ball/bean bag throwing and catching. Alternatively, create activity stations for individuals at each point in the round robin. Examples: marching in place, dumb bells, balance pads/Bosu, etc.

Chapter 2

Using the SMARTfit User App

Performance Tracking

To track individual data, each client must first be added to the trainer's account and activated when using SMARTfit. The appropriate activities and programs should also be assigned to each client. This will help organize the trainers for their training session. Once this is done, individuals can be grouped together for team or class training.

Instructions on how to complete these steps can be found in the following locations:

- The SMARTfit Website: https://smartfitinc.com/fitness/customer-resources/
- The "Help" section within the SMARTfit app: The "Help" option can be found on the Home tab then select "Using the SMARTfit App."
- Our SMARTfit Academy: https://smartfitinc.com/courses/smartfit-academy-level-1-setup/ (new customers can request FREE access from customer support)

We recommend reviewing the SMARTfit App's Data and Build tab to explore the available export options. Reports can be generated in both PDF and Excel formats. Collecting four to six weeks of consistent data is ideal for tracking participant progress over time. These reports are also a great way to keep participants engaged and motivated.

If competition is part of your programming goals, SMARTfit games naturally encourage both individual and team-based competition. Players get a great workout while having fun and posting scores can help reinforce long-term skill retention. The possibilities for how you use your system are truly endless.

Recommended Time and Game Settings for Activities and Programs:

Cardiorespiratory

- Make the Games Last Longer - Set game times anywhere between 30 to 300 seconds. Longer play equals better cardio workout. In group settings, make sure each player gets several turns.
- Move the Start Line Back - Place the start line farther from the targets. Start with 10 feet and go up to 30 feet or more if space allows. Running back and forth increases heart rate fast.
- Use Team Relays - Create simple team relay races using SMARTfit. Choose a longer game time (up to 300 seconds) so players stay moving and rotate turns.
- Keep Everyone Moving - While players wait for their turn, have them do simple exercises in line. For example, jumping jacks, squats, or high knees. This keeps their heart rate up and keeps them engaged.

Speed/Agility

- Keep Games Short - Use 30 to 60 second rounds so players can go full speed without getting too tired.
- Mix Up Movement Directions - Have players move forward, backward, and sideways to the targets. This builds full-body coordination and better footwork.
- Sprint and Retrieve - Throw a beanbag at the targets. Players must sprint to retrieve it and sprint back to the start. Repeat quickly. This builds explosive speed.
- Start Close for Quick Reactions - Set a short start line (about 5 feet away) for fast movement back and forth between the start line and the targets.
- Set Multiple Start Lines - Place 2–3 start lines at different distances. Have players run to the target from each line like a "suicide drill." This improves stamina and change of direction.
- Add Footwork Tools - Use speed ladders, dots, or cones between the start line and the target. Players move through them before hitting the target. This builds foot speed and coordination.

Sports Skill/Accuracy

- Incorporate soccer balls for target drills involving foot-eye coordination, such as dribbling and striking the target using controlled kicks.
- Use basketballs for passing or dribbling drills. Players must dribble, pass, or bounce the ball to hit SMARTfit targets at varying heights.
- Integrate tennis balls for precision-based drills that require hand-eye coordination while performing underhand throws, overhand throws, or controlled bounce throws.

Strength

- Core-based drills such as holding a plank while alternating hand taps on targets are excellent for building core strength, shoulder stability, and endurance under fatigue.
- Use overhead strikes with hand weights or dumbbells to engage the shoulders, arms, and upper back.
- Players perform a squat, then explode upward to strike a target with their hand or a medicine ball. This builds lower-body strength, power, and movement coordination.
- Use a light-to-moderate medicine ball for wall taps or wall passes aimed at targets. This improves rotational strength, explosive power, and upper-body coordination.

Balance

- Incorporate both static and dynamic balance drills to improve postural control and reduce fall risk.
- Use standing balance variations with or without support, depending on participant ability.
- Adjust target selection to challenge balance progressively. More targets in play require greater stability and control.
- Static balance positions include narrow stance, staggered stance, tandem stance, and single-leg stance. These build ankle, knee, and hip stability. Ensure that stance difficulty is appropriate for the participant's level.

- Introduce unstable surfaces such as balance pads, BOSU balls, or Airex pads to increase difficulty during SMARTfit gameplay. Use with supervision when needed.

Cognitive Cool Downs: Executive function and working memory

- The cool-down is a vital part of the session, allowing participants to gradually lower their heart rate while keeping the brain actively engaged. This phase should be calming, low in physical intensity, and mentally stimulating.
- Select cognitively demanding but low-activity SMARTfit games, such as:
    - Pattern Recognition
    - Math Equations (adjust difficulty by modifying max values)
    - Spelling (create custom word lists suited to the group)
- Avoid fast paced or physically demanding drills. Focus instead on attention, memory, and decision-making to leave participants mentally sharp and physically relaxed.

How to Organize Your Group for a Class on SMARTfit System

The workouts in this manual are designed for both individual and group training sessions. For group training, it is essential to plan and organize the group quickly in order to get players into action as soon as the lesson starts.

SMARTfit Stations can accommodate up to 10 participants per station. It is preferable to match participants of similar ages/abilities when choosing a team for each station. To organize teams, get the whole group to stand in a line ranging in height from shortest to tallest. Then count off the players, depending on the number of stations. If there are 4 stations, count off from the front to back: 1, 2, 3, 4, 1, 2, 3, 4, and so on and then send all the 1's to stand at the start marker of station 1, 2's to station 2, and so on. Provide each team with a different colored band.

Additional Tips

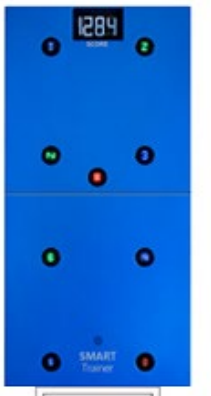

The equipment list for each drill is per station. You can substitute as desired, using equipment on hand to complement the ball kit shipped with each SMARTfit™ system.

Chapter 3

Getting Started With Your SMARTfit System

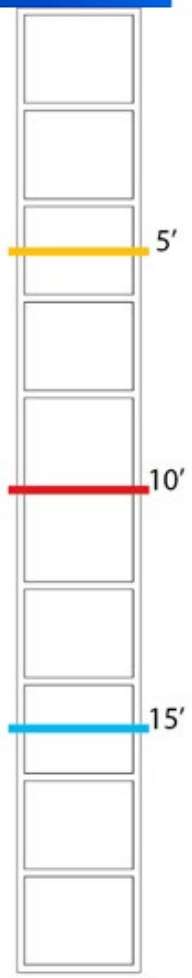

WORKING WITH THE STATIONS:

- The Controller will always display the total score earned by all of the stations
- The controller also shows the time set for each game and will then default to the time chosen, counting down seconds as the game progresses.
- The first station on the left (when facing the system) is station 1.
- Each SMARTfit station's display board centered at the top of each station will keep track of its own score.

Recommended Floor Markings:

Use of the space in front of your SMARTfit stations can add options to your program. Many of our lesson plans include the use of speed/agility ladders, poly spots, cones, and pre-taped lines set at specific distances in front of the SMARTfit system. We recommend taping, painting or incorporating into the existing floor the following: Ladder a minimum of 16' long and 2' wide, divided into 2' squares. Center each ladder at the base of each Station. Place start lines at 5,' 10,' 15' and 20.'

Your SMARTfit™ system is tough, durable and designed to take a beating. However, because it is a computer, the following equipment list will be helpful in preserving its longevity. The following is the recommended equipment list:

Air-filled regulation athletic balls (tennis, basketball, football, volleyball, soccer, etc.)

- Rubber practice baseballs, softballs, lacrosse, cricket or T-Balls (need to bounce).
- Playground balls of all diameters
- Beanbags or dead balls for single directional play
- Swim Noodles or foam bats for striking the targets
- 4 lb. or 2 kilo medicine ball (maximum weight)
- BOSU balls or other balance devices for standing, sitting or lying
- Implements for striking the balls (hockey sticks, paddles, padded bats, rackets, etc.)
- Cones to provide barriers or direction
- Neoprene coated 2, 5, or ten pound hand weights (protect the panel from developing scratch marks)
- Boxing Gloves
- Step Ups
- Floor Matts

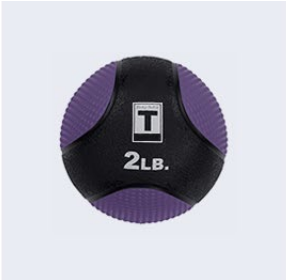

- Hurdles
- Resistance Bands
- Soft wallballs up to balls up to 10lbs are usable

The following equipment is supplied with your system when it is purchased. See spec sheets for quantity details.

- 7” yellow playground balls
- 2 lb. medicine ball
- Beanbag set
- Foam noodles
- Colored wristbands for team participation

What Equipment NOT to use on your SMARTfit™ System

- Regulation baseball. It will NOT be returned properly because there is no bounce. Rubber practice balls work well.
- Regulation lacrosse balls. Use a rubber practice ball instead.
- Regulation cricket balls. Use a rubber practice ball instead.
- 5 pounds and greater medicine balls for throwing at the system. (Okay to use a heavier medicine ball to *touch* the targets while holding the medicine ball with hands).
- Soft wallballs up to balls greater than 10lbs are usable.
- Any hard solid plastic implement such as a stick or bat for hitting targets.

Chapter 4

Group Training Drills

Group Training Format

Group classes can run between 20 and 50 minutes, depending on the number of exercise repetitions and stations included. Each station can accommodate up to 8 participants, regardless of age or skill level. Programs should be designed with modifications and progressions to ensure all participants can engage safely and effectively.

Suggested Group Fitness Class Formats

Warm-up: The Warm-Up should run for 5 minutes within a 50-minute program. The main objective of the warm-up is to loosen the muscles and prepare the participants for some fast-paced movement. A proper warm-up will prepare individuals for instruction, reduce the chance of injury, and set a fun mood for SMARTfit Training.

Skill: The Skill Development section should run for about 10 minutes within a 50-minute program. The main focus here is the connection between the brain and body. Categories include speed, agility, balance, hand-eye coordination, and reaction time. Skill development transfers into the successful completion of life's everyday activities.

Cardio: The Cardiorespiratory Endurance section should run for about 15 minutes within a 50-minute program. The main focus is cardio endurance, stamina, and calorie expenditure. Cardio activity enhances circulation to the brain and muscles, supporting both cognitive performance and physical health.

Strength: The strength section should run for about 5 minutes within a 50-minute program. The main focus is on strengthening the abdominal muscles, back muscles, and pelvic floor. A strong body improves balance, posture, and injury resistance. This can be accomplished through exercises like sit-ups, overhead presses, planks, and bodyweight squats.

Balance: The balance section should run for about 5 minutes within a 50-minute program. The main focus is to reduce fall risk, enhance proprioception and maintain functional independence. They includes static exercises like tandem, single leg, or narrow stances. Incorporate unstable surfaces with these exercises to demand more on the participants.

Cool-Down: The cool-down should last 5 to 10 minutes within a 50-minute program. This allows the participants to lower their heart rate, encourage recovery and engage mental focus that leaves participants calm after their session. For this section use higher level brain games such as Pairing, Equations, or Spelling which involve more thinking and less movement.

Modes of Play

There are four primary ways to run drills on the SMARTfit system.

For the first three modes listed below, refer to the Predesigned Activities found in the SMARTfit App under the Play tab for examples:

Individual: Each player completes the entire game on their own from start to finish. Once the first player finishes, the next player steps up and repeats the same game. This continues until all players have taken their turn.
Partners: Players pair up within their team. The first pair completes the game together until the timer runs out. Once time is up, the next pair starts a new game and continues until their time ends. Repeat until all pairs have participated.
Team: Team members take turns during a continuous game. Each player performs a brief segment, such as striking 1 or more targets, then returning to the start line to tag the next player. Players may strike targets with their hands or use balls for throwing drills. This format allows multiple turns per player within a single timed session.
* See Sections 3 and 4 of this manual for detailed examples on how to run group training classes.
Round Robin: This mode is similar to the Team format, but with quicker rotations. Each player strikes only one target during their turn, then immediately peels off to the end of the line. The next player continues by responding to the previous strike, and so on. This style works especially well for ball play and encourages fast-paced engagement.

Section 2

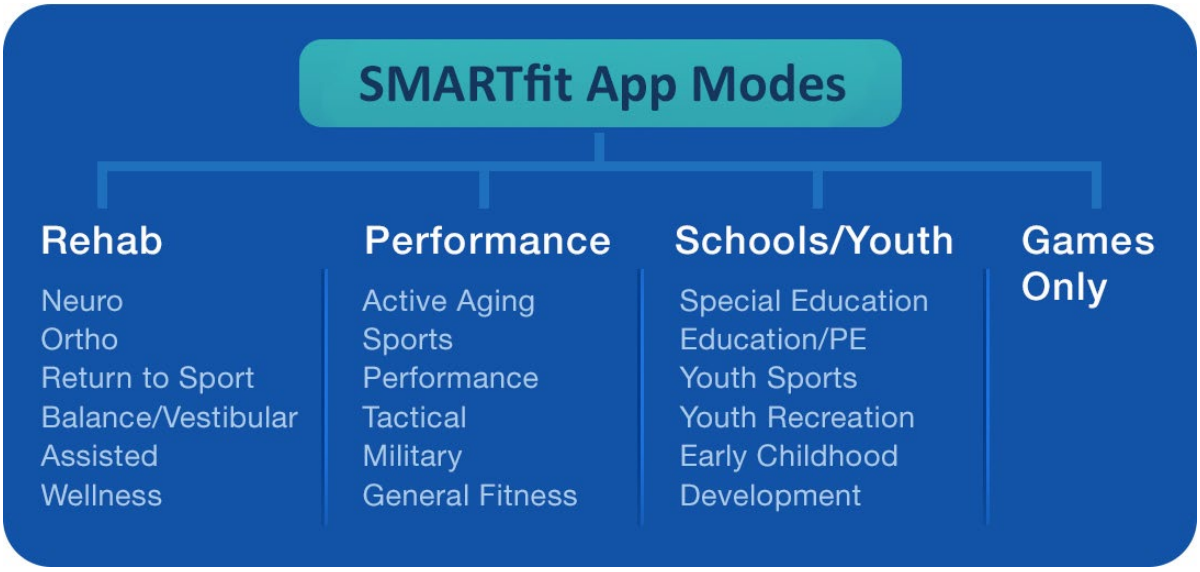

Getting to Know The SMARTfit User Interface App

Chapter 1

SMARTfit User Interface App Components

All SMARTfit Systems are now activated and managed via the SMARTfit User Interface App available on the iOS or Android platforms and can provide programming updates via internet. This is a key feature that ensures that all customers will always be able to access the latest software and programming updates from anywhere in the world.

For learning and demonstration purposes, all SMARTfit Sales Representatives should download the SMARTfit app from Apple or Android app stores. Search for "SMARTfit, Seize the Now". Sign in with Username: demo@smartfitinc.com and Password: SMARTfit20N! Below are screenshots of the five main tabs. The "Test" tab is available only with the RA license but is visible for all to see when you the app is not connected to a SMARTfit controller:

SMARTfit Programming Designed For Every Age and Ability

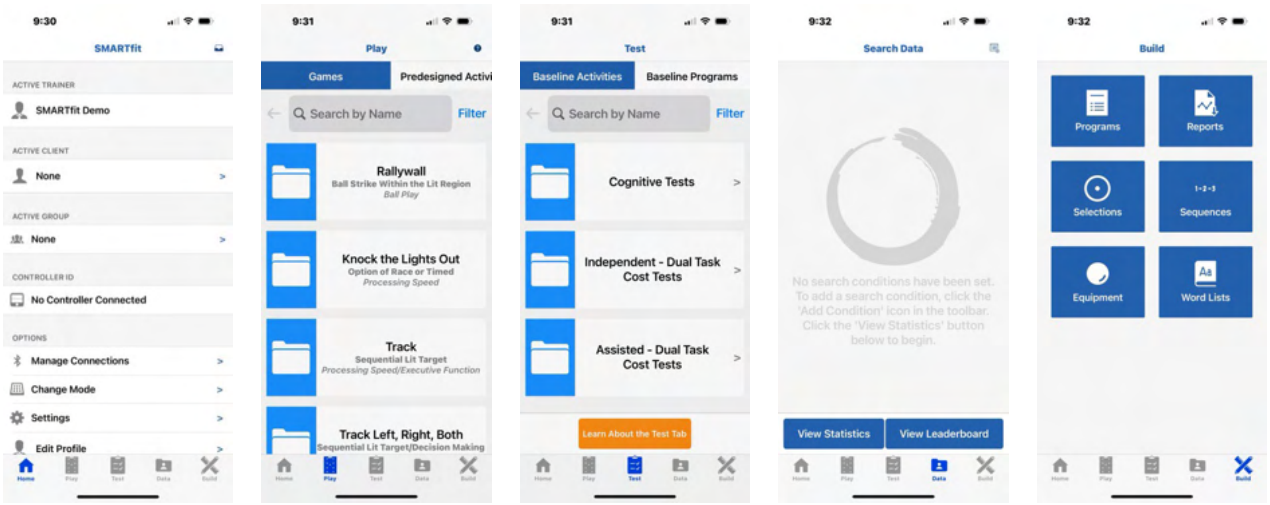

- High Performance Cognitive Training for Athletes.
- Cognitive Motor Dual Task Strength and Conditioning Training for Tactical Performance.
- Active Aging programs in community centers, fitness centers and retirement communities.
- Youth Programs: after school, sports, physical education.

- Early Childhood Development Programs.

Predesigned Programming

SMARTfit offers predesigned programming modules and data tracking for personal, small group and large group training.

Home Play Test Data Build

The following updates are regularly delivered:

- New Games
- New Activities
- New Programs for every demographic group
- New Quick Start programs to help customers get started

SMARTfit's internet-delivered programming updates take place via the iOS/Android SMARTfit app user interface. All programs, client data, and progress tracking is stored on the HIPAA compliant cloud, thus ensuring data is secure and that the systems will never be outdated.

Games: Our games address all areas of the brain and form the foundation of the SMARTfit system. When paired with a physical task they become activities, programs and tests. There are 17 game categories, each focusing on integrating cognitive, neuro and physical abilities. *Cognitive focus* is placed on improving processing speed, attention, executive function, memory, and language. *Physical training* focuses on strength, balance, gait, and activities of daily living.

SMARTfit game categories provide scalable training designed to address multiple brain domains while igniting improvement in the brain and body connection.

User settings within each game allow trainers to precisely control how their clients are challenged. Each folder includes multiple variations of games, and each game can be tailored to match and challenge the physical and cognitive capability of any participant. Challenges can be gradually increased by altering the length of the games as well as by making incremental changes to the settings. Variations include:

- the duration of the game will last
- options for how many and which targets will be used
- the sequence the targets will light up in
- the level of sensitivity the targets have when hit by the user
- the images displayed on each target
- the physical activity while interacting with the targets.

In this way, skill building takes place in a controlled and measured way to ensure the best balance of challenge and safety and also match the level of participants' ability. Note that the systems communications can execute games at a speed faster than the fastest athlete while tracking performance data in real time.

Chapter 2

SMARTfit Gamification Explained

SMARTfit's power lies in its gamified delivery of programming that will continuously demand faster and more accurate results from its participants without incurring overwhelm or boredom. This form of gamified practice, delivering score under time pressure, triggers engagement, incentive and high repetitions to create the practice required to develop and strengthen neural pathways. It is this intensified motivation to improve game results that drives the demand on the brain and motor system to develop new and more efficient neural pathways.

The more individuals practice at a higher level than their comfort zone, the faster the entire neuro system will respond to meet the increasing demand. Continued practice at ever-increasing levels of demand is how accelerated results are achieved. Of significance, the SMARTfit problem-solving games serve to achieve the dual task engagement, which is the key to accelerating cognitive-motor improvement. This is how champions are developed in record time.

Data provides evidence of a person's present level of function and later proof of progress. SMARTfit's tests are quick and easy to administer, with progress reporting designed to reveal the effectiveness of subsequent training as it applies to sports performance, activities of daily living, decreased fall risk, and other performance indicators while also enhancing self-confidence and engagement.

Game categories offered within the SMARTfit user interface app provide scalable training designed to address multiple brain domains while igniting improved performance of the brain and body connection.

User settings within each game allow trainers to precisely control how their clients are challenged and trained. Each folder includes multiple variations of games, and each game can be tailored to match and challenge the physical and cognitive capability of participants. Challenges can be gradually increased by altering the length of the games as well making incremental changes to the settings. Variations include:

- options on how many and which targets will be used
- the sequence
- the level of sensitivity
- the images that will be displayed
- the physical activity that will be done while interacting with the targets.

In this way, skill building takes place in a controlled and measured way, ensuring the best balance of challenge and safety to match the level of ability of participants.

Game Categories:

1. **Rally wall: Skill –** Ball Play **–** Ball Strike Within the Lit Region 3
2. **Knock the Lights Out:** Option of Race or Timed – Brain Domain Focus – Processing Speed
3. **Track:** Strike Sequential Lit Target – Brain Domain Focus – Processing Speed/Executive Function
4. **Track Left, Right, Both:** Sequential Lit Target/Decision Making – Brain Domain Focus – Processing Speed/Executive Function
5. **Chase:** Sequential Lit Target/Preset Time Interval **–** Brain Domain Focus – Processing Speed/Executive Function

6. **Go No Go:** Sequential Lit Target/Preset Time Interval (Interval/Avoid) – Brain Domain Focus – Processing Speed/Executive Function
7. **Seek:** Multiple Choice – Brain Domain Focus – Attention/Executive Function
8. **Metronome: –** Synchronize Taps with Tone – Brain Domain Focus – Memory/Attention
9. **Pattern Recognition:** Tap Matching Targets **–** Brain Domain Focus – Memory/Attention
10. **Stroop:** Match Congruent/Incongruent Targets – Brain Domain Focus – Executive Function/Attention
11. **Flanker:** Tap Targets Prompted by Middle Arrow on Center Target – Brain Domain Focus – Executive Function/Attention
12. **Corsi Block:** Tap Targets in Sequence with Increasing Complexity – Brain Domain Focus – Memory/Executive Function
13. **Trail Making:** Multiple Choice/Completion Time – Brain Domain Focus – Attention/Executive Function
14. **Digit Span:** Tap Targets in Sequence with Increasing Complexity – Brain Domain Focus – Memory/Executive Function
15. **Serial 7's:** Multiple Choice Descending by 7's (Completion Time) – Brain Domain Focus – Memory/Executive Function
16. **Memory Pairs:** Match Identical Targets Until All are Found – Brain Domain Focus – Memory/Executive Function
17. **Pairing:** Match Identical Targets/Refresh Each Time – Brain Domain Focus – Memory/Executive Function
18. **Memory Sequence:** Tap Each Sequential Target – Race (first target sets start) – Brain Domain Focus – Memory/Executive Function
19. **Equations:** Multiple Choice with Problem Solving – Brain Domain Focus – Executive Function/Attention
20. **Spelling:** Tap Correct Order of Letters – Brain Domain Focus – Executive Function/Attention
21. **Time Clock and Timer –** Provides a valuable tool when setting and monitoring non-SMARTfit group activities.

Activities:

An activity is a game tied to a specific physical activity. Numerous client-specific folders are provided, each offering an extensive variety of predesigned dual task (cognitive and motor) activities. With over 3,000 in total, each activity is supported with a *how-to video* designed to demonstrate progressive increments to address each client's ability.

Programs:

A program consists of specifically chosen activities deployed in a sequence. Programs include desired repetitions and length of time. Ready-to-go turnkey dual task programs allow for quick implementation of scalable workouts that also deliver progress reporting. These programs are built from pre-designed activities folders.

Build Your Own:

The build tab offers some outstanding features including the ability to:

- create customized reports from data collected from any pre-designed or self-created program

- design specific target sequences with any game
- create specific levels within a game
- insert a new list into the spelling game.

Data:

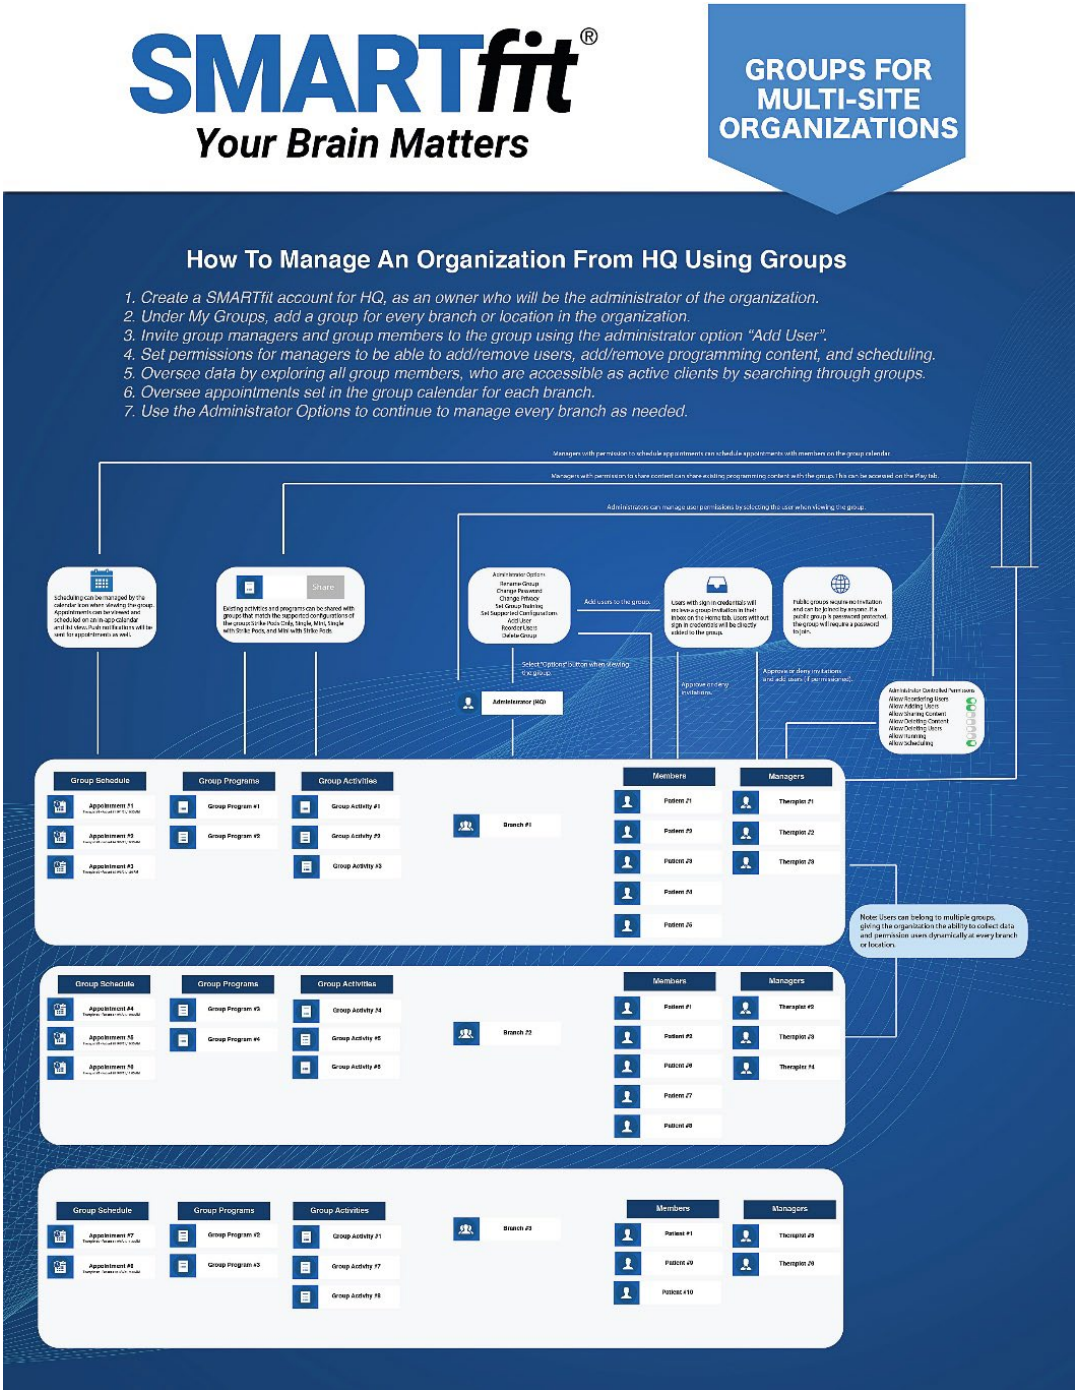

SMARTfit captures data from its programs and tests which can be delivered on screen as an Excel report, or electronically via API.

Multi-Site Data Management: Performance tracking and Reporting by Facility, Trainer and Participant

Standardized programming, testing and data tracking for multi-site organizations provides HQ with a detailed dashboard showing the progress of each client or program at each location. This offers a powerful marketing tool **to increase** the organization's competitive advantage. SMARTfit now provides evidence-based technology that automatically tracks data from rehab or wellness programs across the entire organization – providing the ability to:

- demonstrate efficacy at HQ,
- increase staff accountability,
- motivate participants by sharing assessment and training results with them, and
- market the overall results to attract more participants and differentiate your business!

SMARTfit does all of the above and more, tracking key brain and body performance data by participant, trainer/therapist, and location. Clients, residents, and members enjoy the experience. The gamified, dual-task programming not only becomes faster with more effective results but also is engaging and challenging for all ages and ability levels. **YouTube:** https://www.youtube.com/watch?v=cn0ltf-3ykQ&t=3s/

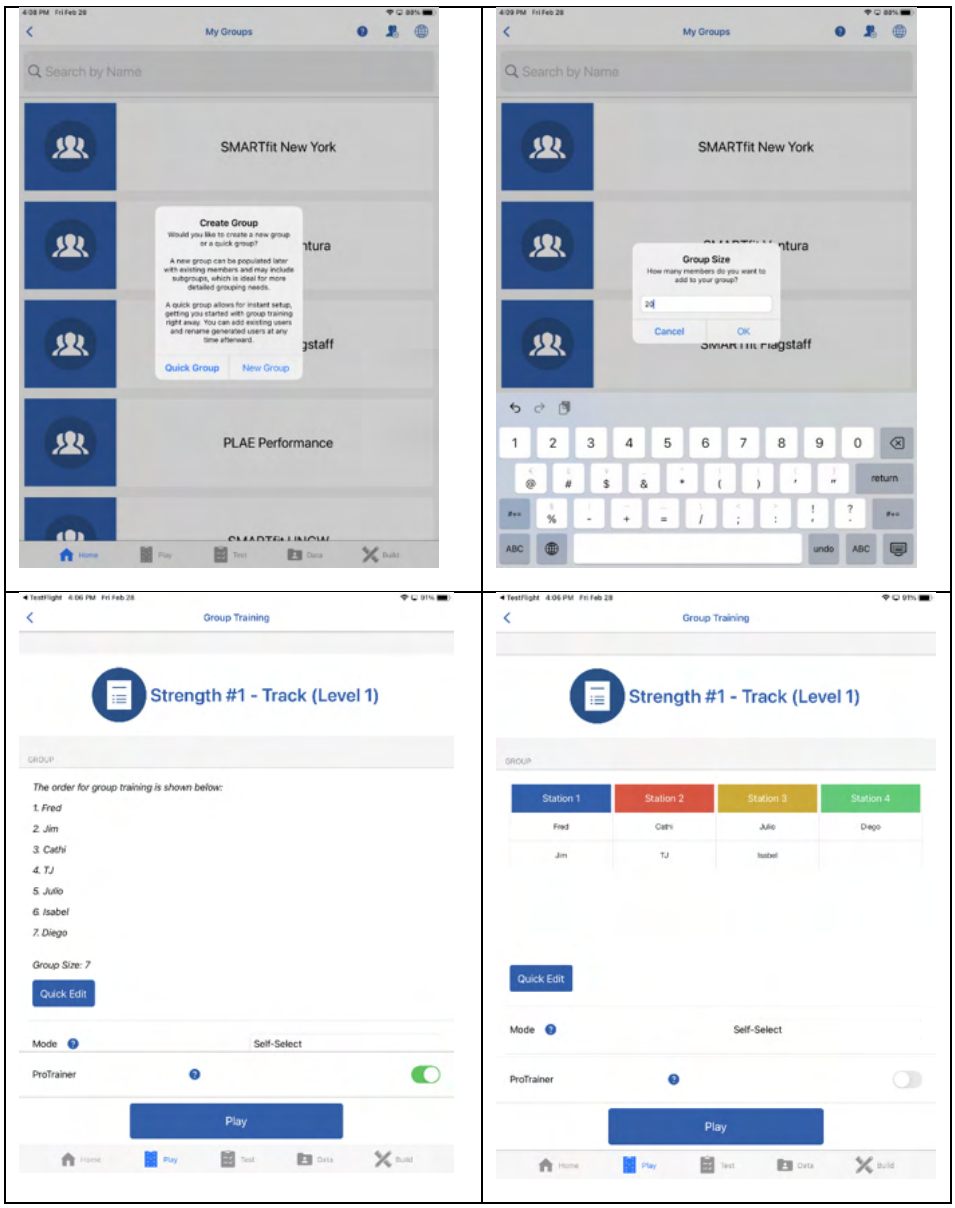

Chapter 3

SMALL Group and Large Group Training Programs

Quick Groups for Group Training Feature Makes it Easy to get Started on All Systems Including the SMARTfit ProTrainer and MultiTrainer

A powerful time-saver for trainers, teachers, and coaches, Quick Groups allows them to set up group training sessions without the need to create individual profiles for each participant. This feature makes it easier than ever to organize sessions efficiently and focus on delivering an engaging training experience.

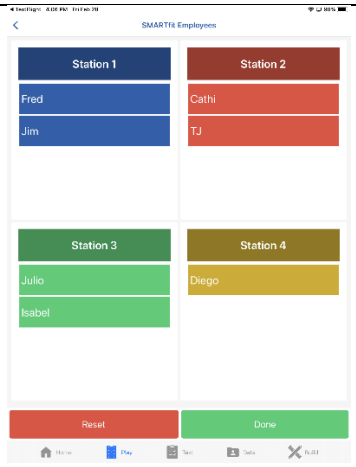

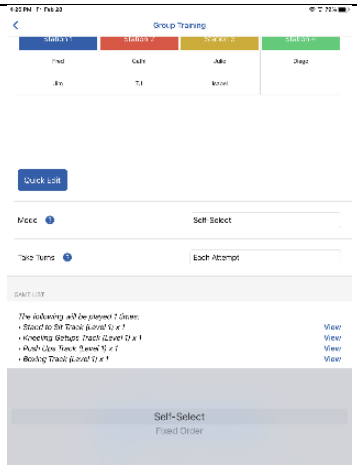

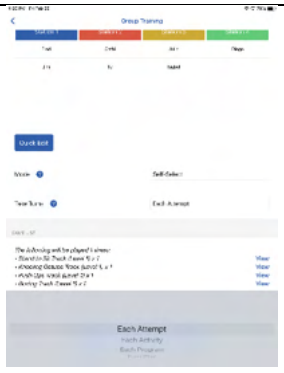

Additional features are available in Group Training that offer various options for setting up group training. These include:

3. Group Training for the ProTrainer and MultiTrainer for Large Groups

The SMARTfit ProTrainer and MultiTrainer now support group training in multi-station mode, making it easier to engage large groups in a structured format. The video shows how easy it is to get started with predesigned group training with data tracking of each individual. Watch the video here: https://youtu.be/8wTI2GtugFc/

Note: remember to get a set of SMARTfit wrist bands to assist players in tracking their place in play. Load your group into a multi-station group training format:

Your active group will be automatically loaded across your stations evenly. You can drag and drop users into different stations if you would like to make any changes. You can also swipe left on a member to remove them from their station if they are not present for this group training session. These functions provide a flexible setup.	
Choose Self-Select Mode or Fixed Order Mode to determine the sequence of participation. Self-select will allow you to choose which member with an available turn is up next at each station. Fixed order will automatically select the next member to be up at each station.	
Alternate users by each attempt, activity, or program for dynamic training sessions.	

Stations are color-coded to match the new SMARTfit wristbands (Blue, Red, Yellow, and Green), streamlining user identification and organization.	
AirPlay support allows you to cast the Group Training Tracker to a second screen when using iOS for real-time progress tracking.	

Access Options: Cloud or Local

SMARTfit offers extensive resources via its Cloud service, including the ability to have everyone's progress stored on the Cloud for any device. This delivers programming and access to regular software updates**.** Because not everyone can enjoy the benefits of the Cloud, SMARTfit also offers Local Mode in which the Android/iOS tablet used to operate the system is set to local mode and data is stored on the tablet itself. When an update is needed, the tablet is taken to a location where the update can be downloaded and can be implemented upon return to the system.

Section 3

Connecting to The SMARTfit User Interface App

Chapter 1

System Settings on Your SMARTfit System

Setting Your SMARTfit™ MultiTrainer/ProTrainer to Perform as Desired

https://smartfitinc.com/fitness/smartfit-app/

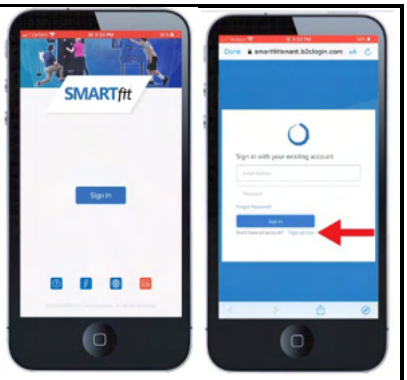

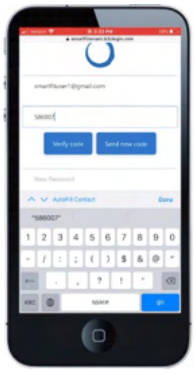

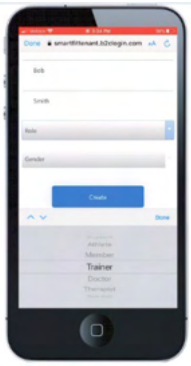

Power up the system:

1. Power up the system by switching the power switch that is located on the right side of the controller. Check to make sure the station powers up correctly and all sensors are operational. Verify all speakers are producing sounds.

Connecting to the SMARTfit User Interface App

1. First download or update the SMARTfit App from either the Apple App Store for iOS or Google Play Store for Android. 2. Type in “SMARTfit – Seize the Now” in the search bar. 3. Select either the download or update option.	

4. Open the SMARTfit App. 5. Select the button to take you to the SMARTfit portal. 6. Select the “Sign Up Now” option shown in the image at right.	
7. Type in your email address first, then select the send verification code button. 8. You will need to open the email sent to the provided address and enter the verification code in the provided field in the app. 9. Select the Verify Code button to be approved. 10. Enter a new password and then confirm that password. 11. Continue to fill in your first and last name. 12. Fill out the gender role and date of birth then select the “Create” button.	
13. It is important to select the correct role. A Manager Role is for a Trainer, Coach, Doctor, Therapist, or Owner and has the ability to oversee a set of users. 14. A User role is for clients, athletes, members, or patients and can still perform every function of the app except managing another user.	

15. Next, select between accounts: Medical, Commercial Fitness, or Home Fitness. Each account offers access to the appropriate medical, fitness, or home applications. 16. Select Fitness if your interest is fitness or sports performance applications. 17. Select Home if the SMARTfit system is located at your home.	
18. Now, let's connect to your SMARTfit Controller. Select the "Manage Connections" menu item.	
19. Select the 8-digit ID number displayed on your CPU.	
20. Wait 5 - 10 seconds, while Bluetooth connects the CPU and SMARTfit App. 21. **NOTE:** You will not be able to connect to the SMARTfit system if you are connected to any other Bluetooth device. Please be sure to disconnect from Apple watches, wireless speakers, headphones, etc. 22. You're now ready to choose a game!	

Section 3

Group Training Activities and Programs in Round Robin Format

Chapter 1: Youth Programs

Programs For School Aged Youth

ELEMENTARY LEVEL

WARM-UP – The Warm Up (Level 1):

Game: Track the Color - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows

Equipment: Hands – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player runs up to their station and hits six targets with their hands as quickly as possible, hitting one target at a time.
- After hitting six targets, the player runs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – Sprint Challenge (Level 1):

Game: Track the Number Step Counting - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows

Equipment: Hands – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player sprints to their station, hitting six targets while performing a stationary march during the strikes.
- After completing their hits, players sprint back to the end of the line and the next player steps forward.
- This pattern continues until the time expires.

STRENGTH – Plank Challenge (Level 1):

Game: Track the Target - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Lower 2 Rows

Equipment: Hands – **Start Line:** 10-15’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player takes turns running to their stations.
- Once they reach their station, they drop down into a push up position on the floor.

- Only the bottom two rows of targets will light up, one target at a time. Each player must strike six targets, while alternating hands with each strike
- After six hits, each player stands up and returns to the end of the line.
- Players continues this same pattern until the time expires.

BALANCE – Balance Challenge (Level 1):

Game: Track the Letter - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows -

Equipment: Beanbags – **Start Line:** 10-15’ Away

- All players line up in equal, diverse groups in front of each station.
- The first player walks or runs to the station while balancing a bean bag on top of their head.
- If the bean bag falls off, they must stop, reposition it, and then continue.
- At their station, the player strikes six targets while keeping the bean bag balanced.
- After completing their hits, the player returns to the end of the line, still balancing the bean bag.
- Continue this pattern until time expires.

COOL-DOWN – Cooldown Toss (Level 1):

Game: Seek the Number Reverse Step Counting - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows –

Equipment: Beanbags – **Start Line:** 5’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player throws overhand or underhand toward the correctly numbered target.
- After the Go target is hit, players strike numbers in sequential order starting from 1.
- After one throw, the player must retrieve their bean bag and hand it to the next player in line.
- Continue the pattern until time expires.

Chapter 1

Programs For School Aged Youth

MIDDLE SCHOOL LEVEL

WARM-UP – The Warmup (Level 2):

Game: Track Left Right Both Random - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Lower 4 rows

Equipment: Hands – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player runs up to their station and hits six targets with their hands as quickly as possible, hitting one target at a time.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After hitting six targets, the player runs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – Sprint Challenge (Level 2):

Game: Seek the Number Step counting - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Middle 3 Rows

Counting by 1’s

Equipment: Hands – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- Con
- Each player sprints to their station, hitting six correctly numbered targets while performing high knees during each strike.
- After the Go target is hit, players strike each target in sequential order starting from 1.
- After completing 6 hits, players sprint back to the end of the line and the next player steps forward.
- This pattern continues until the time expires.

STRENGTH – Plank Challenge (Level 2):

Game: Seek the Color - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Lower 2 rows

Equipment: 2lb medicine ball – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player bear crawls to their station and maintains a plank position while striking the correct color target 6 times.
- Players must only strike the targets matching the GO color displayed at their station.

- For example, if the GO target is yellow on station 1, then all players on station 1 must only strike the yellow target.
- After hitting 6 correct targets, players return to the end of the line and the next player steps forward.
- The pattern continues until time expires.

BALANCE – Balance Challenge (Leve 2):

Game: Seek the Letter - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows

Equipment: String or line of tape and bean bag – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player walks heel to toe along a line of tape or secured line of string while moving toward their station. They must also perform this task with a bean bag on their head.
- If the bean bag falls off, they must stop, reposition it, and then continue.
- Once they reach their station, they must hit six targets displaying the correct letter.
- After the Go target is struck, players must strike each sequential letter of the alphabet starting at A.
- After completing their turn, players must return to the end of the line while maintaining balance of the bean bag on their head.
- Continue this pattern until time expires.

COOL-DOWN – Cooldown (Level 2):

Game: Seek the Number Step Counting - **Seconds:** 210 - **Sensitivity:** Medium - **Selection:** All

Interval: 2

Equipment: Playground Ball – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player throws overhand or underhand toward the correct number.
- After the Go target is hit, players strike numbers in sequential order starting from 1.
- After one throw, the player must hand it to the next player in line.
- Continue the pattern until time expires.

Activities and Programs For Middle and High School Youth

WARM-UP – Warm Up (Level 3):

Game: Track Left Right Both Random - **Seconds:** 240 - **Sensitivity:** High - **Selection:** All

Equipment: Hands – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player runs up to their station and hits six targets with their hands as quickly as possible, hitting one target at a time.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After hitting six targets, the player runs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – Suicides (Level 3):

Game: Seek the Number Step counting - **Seconds:** 240 - **Sensitivity:** High - **Selection:** All

Interval: 3

Equipment: Hands – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- Place cone markers at 5’ distances between the start line and their SMARTfit station.
- Each player sprints to the first cone marker and then back to the start cone. They repeat this for each cone marker until they reach their station.
- Players will strike six correctly numbered targets while performing a burpee after each successful strike
- After the Go target is hit, players strike numbers in sequential order starting from 1 and counting by 3s.
- After completing 6 hits and 6 burpees, players sprint back to the end of the line and the next player steps forward.
- This pattern continues until the time expires.

STRENGTH – Plank Challenge (Level 3):

Game: Seek the Smiley - **Seconds:** 240 - **Sensitivity:** High - **Selection:** Lower 2 Rows

Equipment: Hands – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player partners up with another player on their team. Together they perform a wheel barrow movement to their station. The player that was on their hands maintains a push up position while striking the smiley face 6 times.
- After hitting 6 correct targets, players return to the end of the line and the next player steps forward.

- The pattern continues until time expires.

BALANCE – Balance Challenge (Level 3):

Game: Seek the Letter - **Seconds:** 240 - **Sensitivity:** High - **Selection:** All

Equipment: Spoon and Egg – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- One at a time, each player walks heel-to-toe along a taped line or secured string while balancing an egg on a spoon in either hand.
- If the egg falls, the player must stop, place it back on the spoon, and then continue.
- Upon reaching the station, the player strikes six letter targets while keeping the egg balanced on the spoon.
- After the Go target is struck, players must strike each sequential letter of the alphabet starting at A.
- After completing the task, the player carefully returns to the end of the line, still maintaining balance.
- Continue this pattern until time expires.

COOL-DOWN - Cooldown (Level 3):

Game: Seek the Number Reverse Counting - **Seconds:** 240 - **Sensitivity:** High - **Selection:** All

By 3’s

Equipment: Tennis Ball – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player throws overhand or underhand toward the correct number.
- After the Go target is hit, players strike numbers in sequential order starting from 1 and counting by 3 after each successful strike.
- After one throw, the player must hand it to the next player in line.
- Continue the pattern until time expires.

Chapter 2: Older Adult Programs

Low Impact Activities and Programs For Older Adults

WARM-UP – Warm Up (Level 1):

Game: Track the Color - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player walks or runs up to their station and hits six targets with their hands or drumsticks as quickly as possible, hitting one target at a time.
- After hitting six targets, the player walks or jogs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – March In Place (Level 1):

Game: Track the Color - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows -

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player walks or jogs to their station, hitting six targets while performing a stationary march during the strikes.
- After completing their hits, players return to the end of the line and the next player steps forward.
- This pattern continues until the time expires.

STRENGTH – Med Ball Taps (Level 1):

Game: Track Targets - **Seconds:** 180 - **Sensitivity:** Medium - **Selection:** Middle 3 rows

Equipment: 2 - 5lb medicine ball – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player takes turns walking or jogging to their stations to hit six smiley faces while holding a 2lb medicine ball.
- After six correct hits, each player returns to the end of the line.
- Each player continues this same pattern until the time expires.

BALANCE – Feet Together (Level 1):

Game: Track Left Right Both - Random - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows -

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.

- The first player walks or runs to the station and hits six targets while maintaining a narrow balance stance.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After completing their turn, players return to the end of the line.
- Continue this pattern until time expires.

COOL-DOWN (Cooldown Level 1):

Game: Seek Letter - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 rows –

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player walks or runs up to the station to find and hit four letters.
- After the Go target is hit, players strike letters in sequential order starting from A.
- After completing their turn, each player returns to the end of the line.
- Continue the pattern until time expires.

Medium Impact Activities and Programs For Older Adults

WARM-UP – Warm Up (Level 2):

Game: Track Left Right Both - Fixed - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Lower 4 rows -

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player walks or runs up to their station and hits six targets with their hands or drumsticks as quickly as possible, hitting one target at a time.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After hitting six targets, the player walks or jogs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – March in Place (Level 2):

Game: Seek the Color - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Middle 3 rows -

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Players jog to their stations and strike the targets matching the GO color displayed at their station.
- For example, if the GO target is yellow on station 1, then all players on station 1 must only strike the yellow target.
- After completing 5 total hits while marching in place, players return to the end of the line and the next player steps forward.
- Each player continues this same pattern until the time expires.

STRENGTH – Med Ball Taps (Level 2):

Game: Go No Go - **Seconds:** 210 - **Sensitivity:** Medium - **Selection:** Middle 3 rows

Interval: 2 seconds - **Chance of Avoid target:** 40%

Equipment: 5 - 8lb Medicine ball – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- Each player approaches their station and hits four green "O" targets using a 2 lb medicine ball.
- Simultaneously, when a red "X" appears, the player must perform a squat and avoid striking the red X.
- After hitting 4 targets displaying a green O, the players return to the end of the line and the next player steps forward.
- The pattern continues until time expires.

BALANCE – Feet Together (Level 2):

Game: Track Left Right Both Random - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Upper 4 Rows

Equipment: Drumsticks and air rex pad – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Place an air rex pad horizontally in front of each station.
- The first player walks or runs to the station and hits six targets while maintaining a narrow balance stance on an air rex pad.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After completing their turn, players return to the end of the line.
- Continue this pattern until time expires.

COOL-DOWN – Cooldown (Level 2):

Game: Seek Letter - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Upper 4 rows

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player walks or runs up to the station to find and hit three letters.
- After the Go target is hit, players strike letters in sequential order starting from A.
- After completing their turn, each player returns to the end of the line.
- Continue the pattern until time expires.

Advanced Activities and Programs For Older Adults

WARM-UP – Warm Up (Level 3):

Game: Go No Go - **Seconds:** 240 - **Sensitivity:** Medium - **Selection:** All

Interval: 3 seconds **Chance of Avoid Target:** 40% **with 5 green O hits**

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player walks or runs up to their station and hits 5 targets displaying a green O with their hands or drumsticks as quickly as possible, hitting one target at a time.
- If a red X appears, then the player must perform a squat and avoid hitting the red X.
- After hitting 5 targets, the player walks or jogs back to the end of the line while the next player moves toward their station.
- Each player continues this same pattern until the time expires.

CARDIO – Run In Place (Level 3):

Game: Seek the Number Step Counting - **Seconds:** 240 - **Sensitivity:** Medium - **Selection:** Middle 3 Rows

Equipment: 5-10lb Medicine Ball – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station
- Each player runs up to their station and hits four correct numbers as quickly as they can.
- Simultaneously, each player performs a run in place when it’s their turn striking the targets.
- After the Go target is hit, players strike numbers in sequential order starting from 1.
- After four correct hits, the players rotate to the end of the line.
- Side note, each player should help each other stay on track with the next number.
- Each player continues this same pattern until the time expires.

STRENGTH – Med Ball Taps (Level 3):

Game: Seek Smiley - **Seconds:** 240 - **Sensitivity:** Medium - **Selection:** Upper 4 Rows

Equipment: 5 - 10lb Medicine ball – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Player one from each team holds onto a 5-10lb medicine ball.
- Each player takes turns jogging or running to their stations to hit four smiley faces while holding a medicine ball.
- A squat must be performed after each successful hit of a smiley face.
- After four correct hits, each player returns to the end of the line.
- Each player continues this same pattern until the time expires.

BALANCE – Feet Together (Level 3):

Game: Track Left Right Both Random - **Seconds:** 240 - **Sensitivity:** Low - **Selection:** All

Equipment: 5-10lb Hand Weights and Air Rex Pad – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Place an air rex pad horizontally in front of each station and give the first player on each team handled medicine balls or dumbbells.
- The first player walks or runs to the station and hits six targets while maintaining a narrow balance stance on an air rex pad.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.
- After completing their turn, players return to the end of the line.
- Continue this pattern until time expires.

COOL-DOWN - Cool Down – (Level 3):

Game: Seek Letter - **Seconds:** 240 - **Sensitivity:** High - **Selection:** All

Equipment: Hands or Drumsticks – **Start Line:** 5-10’ Away

- All players line up in equal, diverse groups in front of each station.
- Each player walks or runs up to the station to find and hit three letters.
- After the Go target is hit, players strike letters in sequential order starting from A.
- After completing their turn, each player returns to the end of the line.
- Continue the pattern until time expires.

Section 4

Sports Performance Team Training in Round Robin Format

Sports Performance Training

SMARTfit Stations offer sports-specific, functional training for athletes (novice, amateur, and professional). In addition to helping to refine sports-specific skills such as throwing and catching, SMARTfit also assists in improving speed, accuracy, strength, balance, and coordination. SMARTfit also speeds up the brain providing more time for strategy and technique.

Chapter 1 BASKETBALL

BASKETBALL – LOW IMPACT

SKILL 1 – Stationary Dribble (Level 1):

Game: Track the Color - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Middle 3 Rows

Equipment: Basketball ball – **Start Line:** 10 – 15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player dribbles a basketball toward their assigned station.
- While maintaining control of the dribble with one hand, the player strikes six targets using their free hand.
- After completing six successful strikes, the player passes the basketball to the next player in line and returns to the end of the line.
- The next player immediately begins dribbling toward their station and repeats the same pattern.
- Players continue this sequence until the allotted time expires.

SKILL 2 – Speed Dribble (Level 1):

Game: Track Left Right Both Random - **Seconds:** 180 - **Sensitivity:** High - **Selection:** Lower 4 rows -

Equipment: Basketball – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player dribbles a basketball as fast as possible toward their assigned station.
- While maintaining control of the dribble with one hand, the player strikes one target using their free hand.
- The targets will display directional prompts. A target displaying an “R” means the players strike with their right hand, an “L” with their left hand, or “B” for both hands.

- After one successful strike, the player dribbles as fast as possible back and hands the basketball to the next player in line.
- The next player immediately begins dribbling toward their station and repeats the same pattern.
- Players continue this rotation until the allotted time expires.

SKILL 3 – Bounce Pass (Level 1):

Game: Rallywall - **Seconds:** 180 - **Sensitivity:** Low - **Selection:** Middle 3 Rows

Equipment: Basketball – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player stands at the designated start line and performs three bounce passes aimed at the lit region of targets.
- After completing five passes, the player returns to the end of the line.
- The next player in line steps forward and begins their set of three bounce passes.
- Players continue this rotation until the allotted time expires.

SKILL 4 – Double Dribble (Level 1):

Game: Rallywall - **Seconds:** 180 - **Sensitivity:** Low - **Selection:** Middle 3 rows -

Equipment: 2 Basketballs – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player stands at the designated start line and dribbles two basketballs at the same time. Each player performs four single hand passes with one of the basketballs aimed at the lit region of targets. There should be two passes with each hand.
- After completing four passes, the player returns to the end of the line.
- The next player in line steps forward and begins their set of four single passes.
- Players continue this rotation until the allotted time expires.

SKILL 5 – Basketball with Tennis Ball (Level 1):

Game: Rallywall - **Seconds:** 180 - **Sensitivity:** Medium - **Selection:** Upper 3 Rows –

Equipment: Basketball and Tennis Ball – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player stands at the designated start line and dribbling a basketball in one hand and holding a tennis ball in the other.
- Each player performs four single hand passes the tennis ball aimed at the lit region of targets. There should be two passes with each hand.
- After completing four passes, the player returns to the end of the line.
- The next player in line steps forward and begins their set of four single passes.
- Players continue this rotation until the allotted time expires.

BASKETBALL – MEDIUM IMPACT

SKILL 1 – Stationary Dribble (Level 2):

Game: Go No Go - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Lower 4 Rows - **Interval:** 1.4 seconds

Equipment: Basketball ball – **Start Line:** 10 – 15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player dribbles a basketball toward their assigned station.
- While maintaining control of the dribble with one hand, the player strikes five green “O” targets using their free hand.
- If a red X appears, the player should not strike that target. Instead they perform a skill move, such as a dribble through the legs.
- After completing five successful strikes to a green O, the player passes the basketball to the next player in line and returns to the end of the line.
- The next player immediately begins dribbling toward their station and repeats the same pattern.
- Players continue this sequence until the allotted time expires.

SKILL 2 – Speed Dribble (Level 2):

Game: Seek the Letter - **Seconds:** 210 - **Sensitivity:** High - **Selection:** Lower 4 rows -

Equipment: Basketball – **Start Line:** 10-15’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player dribbles a basketball as fast as possible toward their assigned station.
- While maintaining control of the dribble with one hand, the player strikes one correct letter using their free hand.
- After the Go target is hit, players strike letters in sequential order starting from A.
- After one successful strike, the player dribbles as fast as possible back and hands the basketball to the next player in line.
- The next player immediately begins dribbling toward their station and repeats the same pattern.
- Players continue this rotation until the allotted time expires.

SKILL 3 – Bounce Pass (Level 2):

Game: Track the Number Step Counting - **Seconds:** 210 - **Sensitivity:** Low - **Selection:** Middle 3 Rows

Equipment: Basketball – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
- The first player stands at the designated start line and performs five bounce passes aimed at the single active target.
- After completing three passes, the player returns to the end of the line.
- The next player in line steps forward and begins their set of three bounce passes.
- Players continue this rotation until the allotted time expires.

SKILL 4 – Double Dribble (Level 2):

Game: Track the Target - **Seconds:** 210 - **Sensitivity:** Low - **Selection:** Middle 3 rows -

Equipment: 2 Basketballs – **Start Line:** 5-10’ Away

- Players line up in equal, diverse groups in front of each station.
